1 Overview

FFXIV Character Search is a web application that allows users to search for Final Fantasy XIV characters using the Lodestone website. The application provides:

- Character search by name, world, and data center
- Detailed character information display
- Combat job levels
- Current gear and item levels

2 Installation

2.1 Prerequisites

Before installing the application, ensure you have:

- Node.js (version 14 or higher)
- npm (comes with Node.js)
- A modern web browser

2.2 Installation Steps

1. Clone or download the project files
2. Open a terminal in the project directory
3. Install dependencies:

```
1 npm install
```

4. Build the frontend:

```
1 npm run build
```

5. Start the server:

```
1 npm start
```

3 Using the Application

3.1 Searching for Characters

1. Enter a character name (required)
2. Optionally enter:
 - World name (e.g., Gilgamesh)
 - Data Center name (e.g., Aether)
3. Click the "Search" button

3.2 Search Results

The search results will display:

- Character avatar
- Character name
- World and Data Center
- Current job and level

3.3 Viewing Character Details

1. Click on a character card in the search results
2. View detailed information:
 - Character portrait
 - Title
 - Server information
 - Combat job levels
 - Current gear with item levels

4 Development

4.1 Project Structure

```
1 ffxiv-character-search/  
2     src/  
3         components/    # UI components  
4         utils/         # Utility functions  
5         index.js       # Frontend entry  
6         server.js      # Backend server  
7     public/  
8         dist/          # Compiled JavaScript  
9         css/           # Stylesheets  
10        index.html     # Main HTML file  
11    package.json       # Project config
```

4.2 Available Scripts

- `npm start` - Run production server
- `npm run dev` - Run development server
- `npm run build` - Build frontend
- `npm run watch` - Watch frontend changes

5 Troubleshooting

5.1 Common Issues

5.1.1 No Search Results

If no characters are found:

- Verify the character name spelling
- Check if the world name is correct
- Ensure the data center name is correct

5.1.2 Loading Errors

If you encounter loading errors:

- Check your internet connection
- Verify the Lodestone website is accessible
- Try refreshing the page

5.1.3 Server Issues

If the server won't start:

```
1 # Check if port 3000 is in use
2 # Use a different port if needed:
3 PORT=3001 npm start
```

6 Support

If you encounter issues not covered in this guide:

1. Check the browser console for errors
2. Verify all prerequisites are met
3. Ensure all dependencies are installed
4. Check the Lodestone website status
